Alchemy Studio
04/10/2025

To whom it may concern,

I am more than happy to write this letter of recommendation for Harun Kestendžić, who worked with us at Alchemy Studio, as a Junior Game Developer this last year.

We met Harun first when he released his own game, and since that moment we have seen a great potential and love for game development and programming in him. He stood out the most by far from all the previous applicants we had. We knew then that he'd be our first hire as soon as we were ready to bring in more people.
As soon as he started, he was a great cultural fit and awesome to work with. He adapted very quickly to our processes, development and was able to see the vision for our game very quickly, and align his work with it.

Throughout his time with us, Harun delivered consistently, high quality work, on schedule, without missing a single deadline. It happened more than a few times that he'd complete his sprint a few days early, and is asking us for more work, which pushed the rest of the team to be more productive and efficient as well.

What impressed us the most, is the rate at which Harun was able to grow and learn, we were sure that within three years he would be on a level of a Senior Game Developer.

I am confident that Harun will be a valuable asset in any team he joins. His combination of tech skill, strong work ethic, and enthusiasm makes him well suited for any team.
